

Innovative Healthcare Solutions Bringing Innovative Ideas to Healthcare Traditions

Welcome to Innovative Healthcare Solutions (IHS) E-News quarterly electronic publication that gives you the most up-to-date information on our client collaborations. In an effort to provide you with 'current events' IHS has posted this quarter's top stories. We hope you will find them informative and news-worthy. Presented by Innovative Healthcare Solutions, Inc., Principals Robin Bayne and Patricia Stewart.

The past several months have presented many of us with numerous opportunities and challenges as we review the impact of the HITECH Act, prepare and implement 10.1, and strive to stay the course during these difficult economic times.

On May 28th, in conjunction with Maestro Strategies, IHS sponsored a webinar directed at the top 10 items hospital organizations can do now to prepare for the HITECH Act. A copy of the webinar is available if you were unable to attend. Simply reply to this email and the link will be sent to you.

IHS has been working with our clients, assisting the through implementations and go-lives the past several months. In recognition to the hard work that everyone has contributed we'd like to thank:

- Cascade Health Systems (CHS) has been in the process of implementing new products with the 10.1 software release to include Horizon Expert Notes (HEN), Horizon Health Summary (HHS), and components of CAF. IHS consultants, Vicki Bozeman, Daryl Lynn, Jill Thiele and Jennifer Harrison have been instrumental in this implementation. Jennifer has been project managing the Horizon Lab, Horizon Health Summary and continues to provide her expertise for Horizon Surgical Manager and Pathways Healthcare Scheduling. The go-live is scheduled in July, 2009.

IHS Cindy Birt team member has been working with the education team to assist with the large training piece of this implementation. The team is closely working with their counterparts at CHS towards a successful go-live.

- IHS Director, Elizabeth Pruet is working closely with the Mississippi Baptist Health System (MBHS) hospital team to implement 10.1, which initially had a scheduled go-live in June. A short delay based upon some go-live factors has pushed the go-live to early August.
- Northeast Georgia Medical Center (NGMC) located in Gainesville, GA recently partnered with IHS to assist them with the 10.2 upgrade. The anticipated live is scheduled in October. We are looking forward to helping our new client and welcome them.
- Northside Hospital, located in Atlanta, GA went live with Horizon Cardiology in which IHS Project Manager, Pat Bracknell supported. The go-live was a great success with one of the smoothest go-lives Pat has ever experienced. Northside has been a partner with IHS for the past year and a half and it has been a pleasure working with them.
- IHS is pleased to be assisting an existing client, St. Luke's Episcopal Health System (SLEPHS) with a new project as they bring a new facility on-line.

- Vanguard Health Systems went live with Horizon Expert Documentation (HED), Horizon Expert Orders (HEO), AdminRx, and Clinical Profile at one of the two hospitals in the Chicago market. The go-live was a success with a lot of hard work from at the facility, corporate office and IHS Project Manager, Jean Young and IHS Consultant, Leslie Adams. In addition, IHS Director, Elizabeth Pruett has assisted with the AdminRx implementation including process changes to ensure maximum system usage. This has been a tremendous undertaking with the standardization process across the multiple markets and hospitals. We'd like to extend our many "Thanks" to all the team members that made this such a great success! The team has begun the rollout to the Phoenix market with the first go-live scheduled late fall.
